About Us

At Warne, we've been doing this since 1956 – and a lot has changed over the years, but our approach hasn't. We believe business should be straightforward, dependable, and built on relationships that last. Whether you're ordering parts across the country or working with us locally, our goal is simple: provide quality products, practical solutions, and service you can count on. We understand the work you're doing because we're in this industry too, and we know how important it is to have the right equipment at the right time. This catalog is built to make that easier – clear, reliable, and ready to support whatever job is in front of you.

Policies, Terms & Conditions

Warne Companies wants to express our appreciation for your business. We are committed to a combination of high-quality product lines, knowledgeable sales staff, and prompt service at competitive prices. We will continue to do our very best to provide the same high standards of product and service you have come to expect from us.

Prices

Prices shown are FOB Rapid City SD unless otherwise specified and are current to the best of our knowledge. However, prices may change at any time without notice or obligation as some of our suppliers implement price changes throughout the year. The prices charged will be the current pricing at the time of shipment. If you have any questions, please contact us. Starred (*) items are net prices.

Terms

All orders are sold on a cash, credit card or COD basis unless an open account has been established prior to order for those firms with established financial standings. All products are invoiced NET DUE UPON RECEIPT. Freight charges will be "freight collect". Interest on past due account balances will be 1.5% per month. All payments on accounts will be posted to interest first and principal last.

Orders

All orders must contain a billing name and address, shipping name and address (UPS, FedEx, and common carrier require physical address, no PO Box numbers); name of person placing order and telephone number; and a purchase order number if applicable.

Sales Tax

Sales tax is a continual problem. Therefore, we ask you to notify us with your tax number each year. If we do not have your tax number on file, or you fail to give us your tax number while ordering, sales tax will be charged.

Check Merchandise Immediately Upon Receipt

If a shipment is received damaged or there is a shortage, note on the carrier's receipt. Report any problems to Warne Companies immediately.

Merchandise Return for Credit

Merchandise may be returned for credit only upon authorization by Warne Companies. Upon authorization, a return merchandise authorization (RMA) number will be issued, and merchandise must be returned freight prepaid within thirty (30) days of purchase. Returns made thirty (30) days after purchase date will be assessed a 20% restock charge. All returns must indicate invoice number and date of purchase. Credit will be issued for the net invoice cost less all allowances, freight charges, a handling charge and additional charges for any items not received in saleable condition. Special orders cannot be returned. The final credit issued, in any event, will be subject to Warne Companies inspection to determine the condition.

Quotes

We encourage our customers to call for specific quotes on materials. This insures you of the latest prices and we will honor all quotes for thirty (30) days.

Warne Companies reserves the right to make changes in price and/or descriptions should an error be found. Prices effective January 1, 2026.

Boominator Boomless Spray Nozzles

Benefits include: producing a superior spray pattern with even distribution over the entire pattern, producing a heavy droplet pattern for minimal, drift and better crop penetration, and it can easily spray around obstacles and over uneven terrain. Applications include: noxious weed control, de-icing on roads, bridges, sidewalks, runways and parking lots, dust suppression, lawn, turf and nursery applications, grass fire fighting, orchard, vineyard and vegetable spraying, ponds, lakes, canals for aquatic pest and weed control, and insect control. Please call or check at warneusa.com for complete spec sheet.

Dosatron

Dosatron*

Affordable, on-sprayer chemical injection. No more messy mixing chores. No more left-over spray solution at the end of the day. Just fill your sprayer tank with water and set the Dosatron to the desired percentage of chemical to water. The Dosatron chemical injector precisely injects the pre-set amount of chemical into the flow of water being pumped to the nozzles. This percentage of chemical to water remains constant regardless of changes in spray pump output. On sprayers equipped with automatic spray rate control systems, the Dosatron rate of chemical injection precisely follows the changes in flow and pressure called for by the spray rate control system.

Surge Buster®*

Stopping, starting, or rounding a cure - regardless of the amount of liquid in the tank, the floating "Surge Buster" eliminates surge by constantly deflecting the load in over a thousand different directions. Makes transporting large volumes of liquid safer and less stressful for operators. Flexible design fits any size or configuration of tank. NFPA compliant for use in fire trucks. One baffle per 30 gallons water. Installs through tank top opening. No interior attachments. Works with or without existing baffle. Safe for most chemicals and potable water.
